A3
8. (New) The apparatus of claim 7, wherein the transfer chamber comprises at least six process access ports.

9. (New) The apparatus of claim 1, wherein the process chamber is disposable on the chamber tray.

10. (New) The apparatus of claim 7, wherein the process chamber and the chamber tray form a modular unit.

11. (New) The apparatus of claim 10, wherein the modular unit is mounted to the transfer chamber at the access port.

12. (New) The apparatus of claim 1, wherein the chamber tray is mounted separately to the transfer chamber.

13. (New) The apparatus of claim 1, wherein the process chamber and the chamber tray are mounted to a support frame.

14. (New) The apparatus of claim 13, wherein the support frame comprises rollable support members.

15. (New) The apparatus of claim 1, wherein the chamber tray comprises an enclosure having one or more selected from the group consisting of a pneumatic distribution manifold, process gas manifold, vacuum manifold, water manifold, and helium manifold.

16. (New) The apparatus of claim 15, wherein the enclosure comprises a plurality of facility connections disposed thereon that are in fluid communication with the facility connections of the plumbing tray.

17. (New) The apparatus of claim 1, wherein the plumbing tray is disposed underneath the transfer chamber.

18. (New) The apparatus of claim 1, wherein the transfer chamber comprises at least one transfer means for moving work pieces to and from the load lock and process chambers.

Cont
19. (New) The apparatus of claim 18, wherein the transfer means is a robot.

20. (New) The apparatus of claim 19, wherein the transfer chamber comprises two transfer robots.

21. (New) The apparatus of claim 20, wherein the transfer chamber further comprises at least one lift, the lift comprising a support shaft, pedestal, lift assembly, and rotational assembly.

22. (New) The apparatus of claim 21, wherein the lift is rotatable to maintain an orientation of the work pieces as the work pieces pass between the transfer robots.

23. (New) An apparatus for distributing facilities to devices on a processing system comprising an enclosure having a plurality of facility interfaces and a plurality of chamber interfaces disposed about a perimeter thereof.

24. (New) The apparatus of claim 23, wherein the enclosure comprises a plurality of conduits disposed therein.
